

# Day 2

## To do For 1 Week:

1. Do Research on problems of farmer in india
2. Create Online repository on Github for this project
3. Instagram Posts

## Category:

- Phase 1 - Planning

## Today's Work:

Github: [Click Here](#)

## Problems of Farmers in India:

1. Small and fragmented landholdings
2. Unequal access to irrigation and unreliable rainfall
3. Overuse of groundwater
4. Lack of proper storage and transportation facilities
5. Fluctuating market prices and dominance of middlemen
6. Limited access to market information
7. Difficulty getting access to credit
8. Limited adoption of modern farming techniques
9. Shortage of agricultural labor
10. Disruptions due to extreme weather events
